FIFTH SEMESTER UNIVERSITY LAB EXAMINATION, APRIL 2022

CSL 333 DATABASE MANAGEMENT SYSTEMS LAB

Time: 3Hrs

Max. Marks: 70

1. Consider the following Staff relational schema:

STAFF (STAFFNO, NAME, DOB, GENDER, DOJ, DESIGNATION, BASIC_PAY, DEPTNO)

GENDER must take the Value 'M' or 'F'

DEPT (DEPTNO, NAME)

SKILL (SKILL_CODE, DESCRIPTION, CHARGE_OUTRATE)

STAFF_SKILL (STAFFNO, SKILL_CODE)

PROJECT(PROJECTNO, PNAME, START_DATE, END_DATE, BUDGET, PROJECT_MANAGER_STAFFNO)

WORKS (STAFFNO, PROJECTNO, DATE_WORKED_ON, IN_TIME, OUT_TIME)

a. The primary keys are underlined. Identify the foreign keys. [2]

b. Create the above mentioned tables and populate the tables [20]

Note: Read all questions and populate values accordingly.

c. Include the constraints as mentioned above. [3]

d. Develop a SQL query to list the details of staff who earn less than the basic pay of all staff. [10]

e. Create a view that keeps track of DeptNo, DeptName and number of staff in each department. [5]

f. Develop a SQL query to list the details of staff who have more than three skills. [5]

g. Create an index on StaffNo in Works table [5]

h. Develop a procedure Staff_Increment that will accept staff number and increment amount as input and update the basic pay of the staff in the staff table. [20]
